## PROJECT

### Hospital management system

A hospital management system is a digital platform that integrates various hospital functions. It automates processes such as patient registration, appointment scheduling and billing. It empowers hospitals and adapt to evolving healthcare needs efficiently.

### AMB Calculator

An AMB (Average Monthly Balance) calculator is a tool designed to quickly determine the average balance maintained in a bank account over a specific period, typically a month. Users input their daily balances and the calculator computes the total balance divided by the number of days in the month.
